The Chrysalis: The essays in this volume are concerned with the role of the Jews as mediators between East and West, and the political and religious implications of their intermediary position. The essays are divided into three parts: The first part deals with the historical and cultural context of the Jewish role in the Mediterranean world, the second part is concerned with the political and ideological aspects of the Jewish role, and the third part examines the contemporary implications of the Jewish role. The essays are written by leading scholars in the field, including David de Sola Pool, who has written extensively on the history and politics of the Jews. This volume will be of interest to historians, political scientists, and anyone interested in the role of the Jews in the Mediterranean world.

Commento al "Cratilo" di Platone

Proclus 2018-02-07

The novelty and excellence of Women and the Defects of Men is an important essay by Lucrezia Martelina. In this essay, Martelina argues that women are superior to men and that the gender differences between the two sexes are not due to nature but are the result of social and cultural influences. Martelina's arguments are based on a wide range of sources, including ancient and modern texts, and she provides a comprehensive and insightful analysis of the concept of gender. This essay is an important contribution to the ongoing debate about the nature of gender and its role in society.

World-building and the Early Modern Imagination—A. Kaeyva 2019-07-27 The modern period was rife with attempts to re-imagine the world and the human place within it. This volume looks at natural philosophers, playwrights, historians, and other figures in the period 1500-1700 as a means of accessing the pluralities of world models that circulated in Europe during this era.

The Order of Things—Michel Foucault 2005-08-18 When one defines “order” as a sorting of priorities, it becomes beautifully clear as to what Foucault is doing here. With virtuoso showmanship, he weaves an immensely complex history of thought. He dips into literature, art, economics and even biology in The Order of Things, possibly one of the most influential, yet most overlooked, works of the twentieth century. Early ories on work on power and discourse, nonetheless it was The Order of Things that Foucault’s reputation as an intellectual giant. Puncturing out the entire edge of frontier, Foucault unsettles the surface of literary history. In the famous opening line of the system of thought, one rips with what he calls “aesthetic sense”, intellectual peregrinations from the core of this thinking, this book is crucial reading for those who wish to gain insight into that odd beast called Postmodernism, and a must for any fan of Foucault.

A New Interpretation of Plato—Giovanni Reale 1997 “Reveals the writings of Plato in the light and long-sighted perspective of the Tuftsian School, but it is a book that will interest not only the specialists, but also the general reader. It is a book that will interest not only the specialists, but also the general reader.”

Democracy Ancient and Modern—Judson 1985 This elegant and provocative book is perhaps more important now than when it was first published. The three essays that comprised the first edition have developed a remarkable discourse between ancient Greek and modern concepts of democracy, in the belief that such societies could help us understand the other. To the original three essays, Sir M. F. Judson has added two that clarify and elaborate the thinking of the first edition. The two new essays argue that “Ancient Athenian oligarchy” and “Censorship in Classical Antiquity” combine with “Leaders and Followers,” “Democracy, Consensus, and the National Interest,” and “Socrates and After” to make this book an unusual inquiry. Few contemporary writers are able to bring to the subject the depth of learning and the persuasive power of language that Sir M. F. Judson brings.

The Homeric and the Poetics of Hades—George Alexander Gagnon 2018-03-02 Homer and the Poetics of Hades offer a new and unique approach to the Iliad and, more particularly, the Odyssey through the exploration of the role and function of the Underworld as a poetic resource permitting an alternative perspective on the epic past. By portraying Hades as a realm where vision is not possible, Homer creates a unique poetic environment in which social contacts and divine prohibitions do not apply. Homer’s poems are characterized by the depiction of on-the-spot encounters that emulate that of the Muses but which at the same time is markedly distinct from it. In Hades representation and, alternation of, important epic forms and values can be pursued with greater freedom, giving rise to a different kind of poetry: the ‘poetics of Hades’. In the Iliad, Homer offers us a genuine and exciting poetic innovation. The Iliad takes place in Oriental Ashurbanipal’s palace. The recollection offers us an approach to the past in which regret, selfishness, and a lingering memory of intimate and emotional moments displaces an objective tone and traditional exposition of heroic values. However, the potential of Hades for providing alternative means of communicating the past is more fully explored in the ‘Nekyia’ of Odyssey 11: there, Odyssey offers an unprecedented narrative structure in which the hero manifests a deep awareness of the sacredness of heroic and epic past, while the absolute confinement and alternation of important epic forms and values can be pursued with greater freedom, enabling a different kind of poetry: the ‘poetics of Hades’.
