Television, Tabloids, and Tears-June Shattuck 1995 I am Bierkopf, Rainer Faulhaber declared this debate, aligning himself with the protagonist of his widely seen television adaptation of Berlin Alexanderplatz. The statement provoked an unprecedented national debate about what constituted an acceptable German artist and who has the power to determine art. More than any recent German director, Faulhaber embodied this debate, and June Shattuck shows us how much this can tell us, not just about the man and his work, but also about the state of "culture" in Germany. It is fascinating in itself that Faulhaber, a high-profile public figure...

Tapping Hitler's Generals-Stinke Neitzel 2007 Between 1942 and 1945 the British Intelligence Service undertook an extraordinary surveillance operation. In the sealside surroundings of Trept park, a large mansion with extensive grounds in North London, they saw the state of the art bugging equipment to listen on the private conversations of captured high-ranking German officers. Unlike the countless postwar interrogations, these were unprecedented conversations held freely among the officers, during which they touched upon the most sensitive issues. The officers discuss the July Plot of 1944, the failed attempt to assassinate Hitler, collaboration with the enemy, and their experience of German war crimes. In this major new work Professor Neitzel has examined these incredible transcripts in depth for the first time. His findings address important questions regarding the officers' attitudes towards the German leadership and Nazi policies. How did the German generals judge the overall war situation? From what date did they consider it lost? How did they react to the attempt on Hitler's life in July 1944? What knowledge did they have of the atrocities, either through their own experiences or based on the reports of others? Includes biographies of all four GC andIolo appear in the transcripts. This research is a must for any serious scholar of the period and anyone interested in exploring the truth behind the image of an "unleashed Weltmacht" - jacket cover.

Her desire to be a better role model to her daughters compelled her to confront common personal foes, including a riddle, a drug, and a swimming pool and surf. She includes essays of the kind that could help her children when they find themselves in their own problems. Consumption and Violence-Alexander Solomon 2018-01-05 Combining the tools of political, social, cultural, and intellectual history, Consumption and Violence: Radical Protest in Cold-War Germany explores strategies of legitimation developed by advocates of militant resistance to certain manifestations of consumer capitalism. The book contributes to a more sober evaluation of West German protest movements, not just terrorism, as it arises from emotional and moral judgments, but takes the protesters' approaches seriously, which, regarding consumer society, had a radical civil. Political violence is not presented as the result of individual shortcomings, but emerges in relation to major societal changes, i.e., the unprecedented growth of consumption. This new perspective sheds important light on violence and radical protest in post-war Germany, as previous books have failed to examine to what extent these forms of resistance should be regarded as reactions to changing regimes of provision. Continuing the recently growing interest in...
